Greg,
Included in Dr. Bob's message is the google earth link for the Bayou Corne site. Joe Ball said something about wanting a password on the link to open it. I don't think it's an effective way to secure the site since anyone who forwards on the link would send along the password anyway. Let me know if you think I need to change anything. If it looks good to you and you don't care if it has a password then the attached link should work for whoever you forward it on to. Just remember that it works best if you download it to your hard drive and then double click the link. As long as Google Earth is installed on the computer and there is an internet connection it should start up on its own.

Subject: Corne Gas Leak nlink

Tim,

I finished the nlink file creation. Sorry for the delay. I ended up having to redo the infrared data and it took some time.

Check out all the nlink selections as I quickly did this and it may still have an error.

Call if you need something.

Regards,
Bob
